DROP OFF FORM

Drop off appointments cannot be made for animals with symptoms including vomiting, diarrhea, coughing or sneezing, as these symptoms may be contagious and potentially dangerous for the other pets visiting our practice today. If your pet has vomiting, diarrhea, coughing or sneezing, please call our office to clarify the details prior to your drop off or schedule as a normal appointment to see the doctor. If your pet is dropped off and found to have these symptoms, they may be put into our isolation ward and additional fees will be incurred.
